

OWI-Consulting *Onsite with Insight*

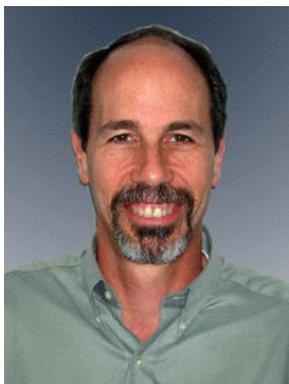

Specializing in Fluidized Bed Processing

July 1, 2008

Announcing the inauguration of the consulting practice of David M. Jones

After a 28-year career at Glatt Air Techniques, Inc., David M. Jones left his position as Vice President of Pharmaceutical Services to establish OWI-Consulting. Specializing in fluidized bed solid dosage form processing, the practice will assist clients with equipment selection guidance, product and process development, scale-up and technical transfer, process justification and validation, process troubleshooting and operator and staff training.

David M. Jones

An internationally recognized speaker, Jones has presented at the AAPS Symposia (national and regional); NJPhAST; various vendor-sponsored programs (Evonik, Colorcon, Lasentech, etc.); and for the FDA (OGD and CDER). He has conducted more than 50 custom training seminars for industry clients. At Glatt, he was the course director for the semi-annual Process Training Seminar and a process consultant to the formulation group. For the equipment division,

he was an initiator of the global standard for machine and insert configuration, and an advisor for the functionality of process control systems. He has published more than fifteen articles, five book chapters, and is the recipient of seven U.S. patents, including the technique known as the Wurster HS (patented by Glatt Air Techniques, Inc.).

The internet website address for the practice is www.owi-consulting.com. Visit for more details on the company's vision and mission. Here are some brief highlights:

News and Events

On the home page, look for dates of upcoming speaking engagements and presentation topics. Other news related to OWI-Consulting will also be posted.

Onsite Services

1. **Process Training Seminars:** Onsite generic or custom tailored seminars combine classroom theory with hands-on process applications on client equipment. Participant testing will occur to support requirements for staff training.

OWI-Consulting On Site With Insight

2. Preferred Provider Agreements: For an annual fee, priority clients will be provided with onsite and office consultation for routine project guidance. The number of trips, their duration and the participants (client sites and staff) will be identified.
3. Per Diem Consultation: For clients with immediate or short-term needs, OWI-Consulting will travel to a client site for a per diem fee (plus travel expenses), schedule permitting. Examples may include acute process troubleshooting during product/process development or sudden and inexplicable batch failures during routine manufacture.
4. Project-based Consulting: For longer duration and/or projects such as scale-up or tech. transfer for a specific product, OWI-Consulting will assist in identifying project milestones. Examples may include the drafting of protocols, equipment evaluation (performance and IQ/OQ ranges), executing experiments and batches, developing and testing final batch recipes, and summary reports.

Forms

Time is of the essence - use the Forms link to download a copy of a generic non-disclosure agreement. If your company requires this type of agreement prior to the disclosure of information, review and sign it to get the ball rolling quickly. Brochures and other information are posted and available.

Contact Us

On the website, please fill in your contact information and you will be added to our database so that we can keep you updated with periodic mailings.

Insights

On at least a monthly basis, a short document on a germane topic will be posted on the website. In the near future, insights will be offered on the establishment

of operating limits for critical process parameters, the incorporation of DOE (design of experiments) in product development, from the bench to the production floor, use of electronically collected data as a tool for retrospective process troubleshooting and remediation and the establishment of a spray nozzle maintenance and testing program.
